

## TEMPPI - digital thermometer for stock pile

TEMPPI is made for routine temperature measurements in peat and other biomaterials.

Meter is fast reacting, stainless, durable, lightweight and has no moving parts.

Knowing the temperature in the stockpile secures you to maintain the high, original quality.

TEMPPI -temperature reading is ready in less than a minute.

Fast  
Light  
Durable

### Specifications

Measuring range

- 50 ... + 110 C

Working temperature

- 10 ... + 50 C

Accuracy 1,0 C

Resolution 0,1 C

Sensing rate 1 sec

Constant calibration

Battery AA 1,5 V

Battery life 5 years

Quarantine 1 year

### Models, TEMPPI-length in cm

TEMPPI-150

TEMPPI-200 (6'7") \*

TEMPPI-250 (8'2")

TEMPPI-300 (9'10")

\* Longer models can be delivered in two-piece

°C as default,

°F when ordering
